

Basket Stretcher (Without Bridle)

The Basket Stretcher is designed to cover most of emergency rescue situations. It's made of high resistive material (ABS) and it has many hand-holds, which make it ideal for quick and safe transfer.

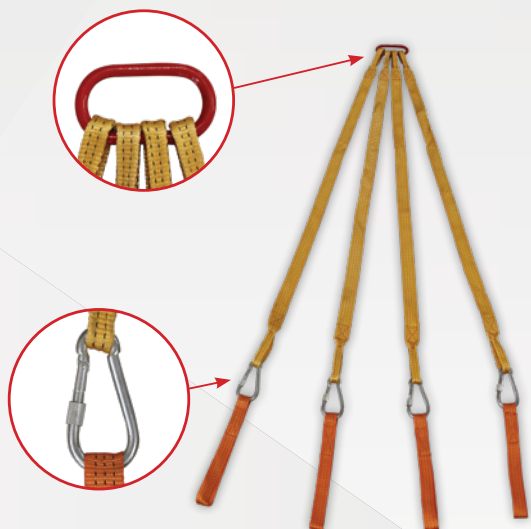

Includes 3 safety belts, foam pad for patient comfort, adjustable foot-securing mechanism for vertical lifting and special rings for Bridle. By using it with the Four Point Bridle (not included), it is ideal for aerial rescue.

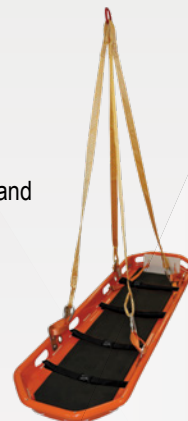

Conforms to ISO 13485:2003
