

Installing 72348 LALIZAS Lifejacket LED Flashing Light “Alkalite II” on ISO & SOLAS Foam Lifejackets

1. Fitted on the lifejacket webbing

Step 1

Place the black clip under the upper/chest or the waist webbing on the side where the buckle is steady. If upper webbing is available, it is preferable, since it offers higher position above sea level.

Step 2

Angle the light and press it down to lock the two pieces together.

Step 3

Ensure the light is securely attached and cannot be removed by pulling.

Upper/Chest Webbing

Waist Webbing

Installation on Lifejacket Compact Mini, SOLAS/MED

Special webbing loop for placing LALIZAS Lifejacket LED Flashing Lights 72348.

Compact Mini

The installation process on this webbing is the same as for “1. Fitted on the lifejacket webbing”.

2. Recessed on the lifejacket

Equipment

LALIZAS Hole Puncher for Lifejacket Flashing Lights 72348-9, Int. Ø34mm, Ext. (product code 71215).

LALIZAS Base for Lifejacket Flashing Light 72348 (product code 72543).

Step 1

Use a LALIZAS Hole Puncher (71215) to make a hole at a specific spot on the foam lifejacket.

Step 2

Remove the foam from the cut area.

Step 3

Place the LALIZAS Base for Lifejacket Flashing Light 72348 (product code 72543) into the hole.

Step 4

Place the LALIZAS Lifejacket LED Flashing Light "Safelite IV" into the base.
